

REGION 8 PRESENTS
**EDCO ANAEROBIC DIGESTION
FACILITY TOUR**

WEDNESDAY, MAY 18, 2022

9AM

925 W. MISSION AVE.,
ESCONDIDO 92025

Join Region 8 for an educational tour of EDCO's new state-of-the-art Anaerobic Digestive (AD) plant and recycling center. The fun will begin with a breakfast before the tour, at a local restaurant. We will then walk next door to begin the EDCO Anaerobic Digestive Facility.

The Anaerobic Digestive facility helps cities meet California legislative mandates for increased organic recycling. AD is the natural process in which microorganisms break down organic materials such as food waste, green waste, fats, oils, and greases. Anaerobic digestion happens in closed spaces with no oxygen and converts organic material into Renewable Natural Gas (RNG) and fertilizer.

Register today at:
www.mmasc.org/Calendar.aspx?EID=631.
